

# VERMONT WEEKLY INFLUENZA SURVEILLANCE REPORT

March 12- March 18, 2017 | MMWR Week 11

#### **KEY POINTS**

Influenza activity was categorized as widespread for MMWR Week 11

- Levels of Influenza-like Illness (ILI) activity seen in emergency departments decreased
  - Of the total emergency room visits, 3.4% were due to ILI
- Sentinel providers reported 1.2% of patients had ILI
- Vermont Department of Health Laboratory reported 11 positive flu tests
- National Respiratory and Enteric Virus Surveillance System reported 31 positive flutests
- Received reports of positive flu cases from multiple hospitals throughout the state
- One outbreak at a long-term care facility in the Northwest region

#### FLU SURVEILLANCE SEASON

### START

MMWR Week 40 (Week End Date 10/08/16)

#### **END**

MMWR Week 20 (Week End Date 5/20/17)

# Syndromic Surveillance of Influenza-Like Illness (ILI) at Vermont Hospitals, 2016-2017 vs. Historic Data

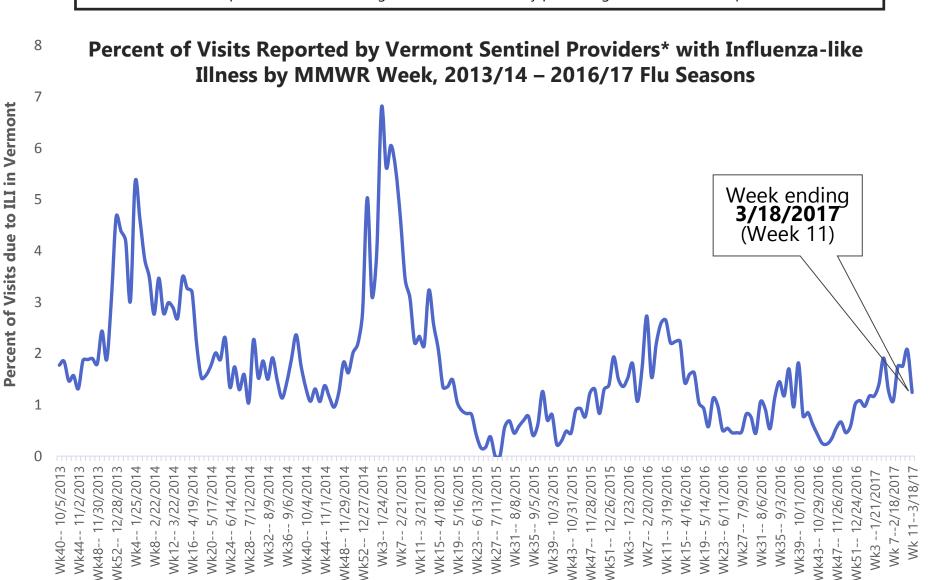

#### **Sentinel Provider Data From ILINET**

Sentinel providers report the number of patients with an ILI seen by their practices each week

ILI is defined as a fever of at least 100° F and cough and/or sore throat, without a known cause other than influenza

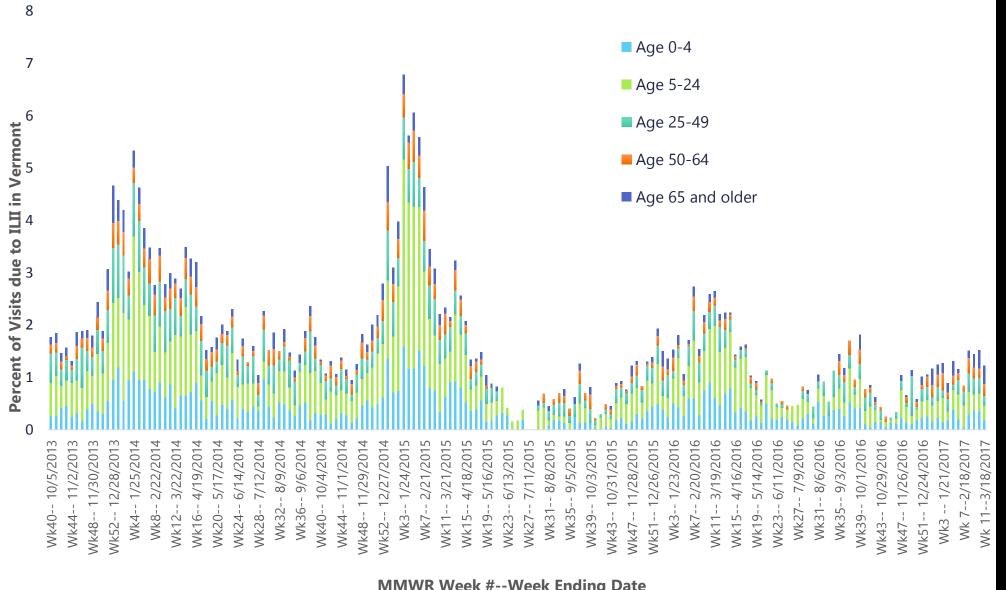

There are 13 medical practices located throughout the state currently partnering with the Health Department as sentinels

Week Ending Date- CDC Week #

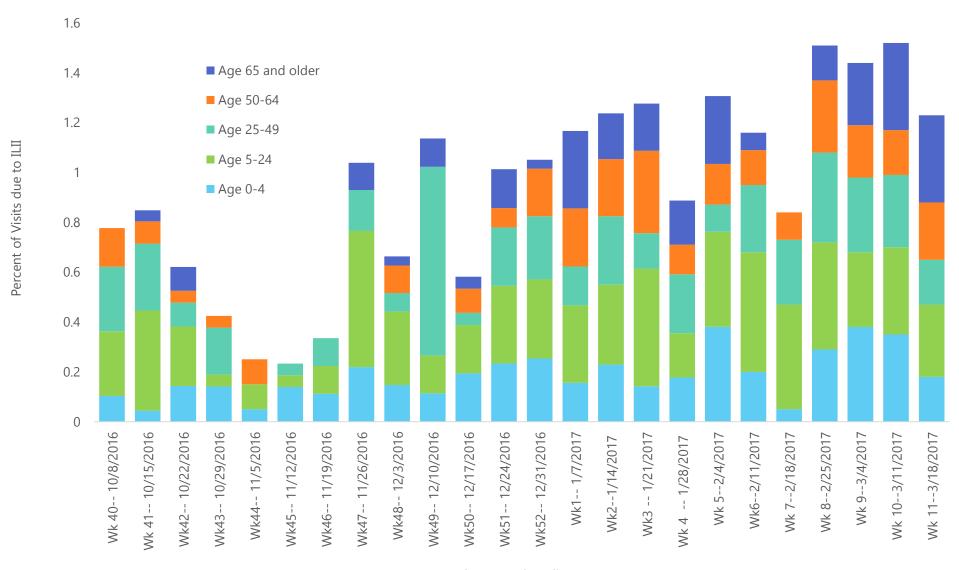

## Percent of Visits Reported by Vermont Sentinel Providers\* with Influenza-like Illness by Age Group by MMWR Week, 2013/14 -2016/17 Flu Seasons

# Percent of Visits Reported by Vermont Sentinel Providers\* with Influenza-like Illness by Age Group by MMWR Week 2016/2017 Flu Season

# Vermont Department of Health Laboratory (VDHL) and National Respiratory and Enteric Virus Surveillance System (NREVSS)

Individual influenza laboratory results are not reported to the Vermont Department of Health. The data below represents an unknown subset of the actual number of flu tests done in Vermont

VDHL tests specimens for flu to identify exactly which strains are currently causing illnesses in the state. Flu testing at the state laboratory is for surveillance purposes and completed on specimens submitted to VDHL

NRVESS data is collected from collaborating university and community hospital laboratories. These participating laboratories report positive results for a number of viruses, including influenza, on a weekly basis. Three Vermont hospitals contribute data into this system and is voluntary

	VDHL* Current Week (Mar 12–Mar 18, 2017)		VDHL* 2016-2017 Season Total (Oct 2, 2016-Mar 18, 2017)		Curr (Mar '	REVSS* ent Week 12–Mar 18, 2017)	NREVSS* 2016-2017 Season Total (Oct 2, 2016-Mar 18, 2017)	
	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
